

SWS-4000A

Hemodialysis Equipment

Intelligent Security System Escort For Treatment

Comprehensive Treatment Mode

- HD
- Sequential HD
- IUF

* KTV On-line

- The treatment guidance such as Urine clearance, Urea concentration decrease etc can be checked during the treatment, which can provide the treatment prescription.

* BPM

- Measure the blood pressure and heart rate of the patients, which can decrease the operation burden of the medical staff.

Real-time Leak Monitoring

- Balance system for real-time leak monitoring to ensure the safety of patient.

Back-up Power

- Blood circuit runs for more than 40 minutes.

AlarmLED

- The IV pole integrates three color alarm LED such as red yellow green, which can be checked from distance with clear version .

Multi-treatmentProfiles, ProvidingPersonalizedTreatment

- Sodiumprofile
- UFrateprofile
- Carbonateprofile
- -----
- Heparinflowprofile
- Dialysateflowprofile
- Dialysatetemperatureprofile

* BicartHolder

- UsingBicartonline,avoidmicrobial contamination of B fluid.

InformationSystemRJ45Interface

- The information management system can be connected through the RJ45 interface, so that realize intelligent and refined management of the entire treatment process.

Technology Empowers Hemodialysis

Intelligent Operation

- 12.1inch LCD+touch screen, multi-language operation interface.
- Adjust the level of venous bubble catcher automatically to prevent blood pollution and reduce dialysis risk.
- Convenient process for sequential dialysis (Dialysis $\longleftrightarrow$ IUF) and high-low sodium sequential dialysis.

Safe & Effective Treatment

- The hydraulic, blood circuit and monitor system can be mandatory self-test, so that ensure the safety treatment.
- Ultrasonic and optical detector on venous ensures the safety of blood return.
- Dialysate configuration feedback control system to ensure accurate dialysate concentration.
- Advanced capacity balance feedback control system, ensures UF precision.

Visual Intelligent System

- Preset automatic switch time and disinfection mode, and record all disinfection.
- Dynamic tracking and monitoring functions such as arterial pressure, venous pressure and transmembrane pressure can respond to abnormal situations on time and alarm.

Powerful Compatibility

- Can be operated with various brands of filters.
- Compatible with various brands of dialysis powder, bloodline and other hemodialysis consumables.

Professional Technical Services

- Professional Technical Services: Professional technical services team, which can provide real-time response to hospital requirement and can offer solutions in 12 hours, so that ensure the carefree usage.
- Free Regular Training: offer regular training to the medical staffs, which can strengthen sensitivity of medical staffs and emergency response for equipment operation
